

Mohammed Chisti

Full Stack Developer

React + Redux frontend w. Rails API backend. Also knowledgeable in Postgresql, Middleman, HTML, CSS, Javascript ES6, JQuery, ESLint, Codeship, Heroku and AWS S3.

Experience

WeWork — Technical Coach (Remote)

NOV 2017 - PRESENT

WeWork bought out the Flatiron school and has introduced coding to its own employees. I work remotely to help other students in both the WeWork and Flatiron School Community to learn how to code in Rails, Sinatra, React + Redux, JQuery, JavaScript and SQL when their stuck or not understanding a concept.

Fidity — Frontend ReactJs Developer

MAR 2017 - AUG 2017

FinTech social media start-up that gave users portfolio advice, similar to Stash. Additionally users were also able to create a profile page, create chats, see advice others are taking and view a home feed of their follower's choices.

- Developed UI/UX from scratch through React + Redux, which included building an entire user profile page, home feed, portfolio advice, chat system and bank balances.
- Strong focus on implementing real-time group messaging system using, both Rails ActionCables and npm actioncables package for React.

Microsoft — Service Advisor

MAY 2015 - JAN 2016

- Provided service excellence to customers in troubleshooting and resolving computer problems related to Microsoft software and products, and assisted in the technical launch of the first Flagship store in New York City.
- Resolved 25-35 hot fixes a day and 15 -20 extensive troubleshooting requests a day in a high-volume retail location.
- Taught and mentored customers one-on-one in usage of technical products, and led educational presentations.

Research Foundation of CUNY — Computer Technician

SEP 2011 - JAN 2015

- Troubleshoot all hardware/software computer issues in school building (2 floors with 100 computers total).
- Received consistently high commendations, leading to second position as an After School Robotics Instructor.

Technical Projects

Hi Messenger — React + Redux w. Rails

Current working project

A SMS alternative application. Implemented through the use of ActionCables. Mostly used to experiment while building a product.

WhereTo — React + Redux w. Node

github.com/SeeYouSpaceCowboy/wheretoe

A beautiful Yelp Search Client to help you discover new restaurants, bars, scenery, etc. Utilized Yelp Fusion API for search query results.

A Junior Dev — React + Redux w. Rails

ajuniordev.herokuapp.com

- Implemented a search bar, created from scratch that enables users to search for jobs in real time.
- Employed pure CSS utilizing React + Redux to create beautiful UI/UX.
- Postgresql database.

Education

Flatiron School — Full Stack Web Dev.

2017 New York, NY

Taught React + Redux, Rails, HTML5/CSS3/Javascript and Postgresql.

Borough of Manhattan Community College

2011 New York, NY

Earned 74 completed credits in Computer Science & Electrical Engineering.
